CAREER OBJECTIVE

Aspiring Junior Frontend Developer with a foundation in modern JavaScript and React-based web development. Seeking an opportunity to build accessible, responsive, and user-friendly web applications while continuously strengthening my problem-solving skills and growing as a software developer.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS
Backend & Database: Node.js, Express.js, MongoDB
Tools: Git, GitHub, VS Code

SOFT SKILLS

Communication | Teaching & Mentoring | Self-Learning

PROJECT

HELP EVENTS — Humanitarian Event Management Platform

A web platform designed to support humanitarian initiatives such as winter clothing and blanket distribution, helping people discover and participate in community support events.

Live: helpeventsfrontend.vercel.app | **GitHub:** help-events repository

- Browse and explore humanitarian events.
- Join an event and prevent duplicate participation by the same user.
- View joined events in a card-based list with the joining date.

WANDERLUST — Travel & Booking Platform

A travel booking platform that allows users to explore travel destinations, discover available packages, and manage their bookings through a user-friendly interface.

Live: Wander Lust Live link **| GitHub:** Wander Lust repository

- Explore travel destinations and view detailed destination information.
- Authenticate users with email and social login options.
- Book travel packages and manage personal bookings.

BANGLA NEWS 24 — Online News Portal

A responsive online news platform that allows readers to explore the latest news, browse news by category, and read detailed articles through a clean and user-friendly interface.

Live: Bangla news 24 live link **| GitHub:** Bangla news 24 repository

- Browse the latest news articles and featured stories.
- Explore news articles by different categories.
- Read detailed news articles with relevant information.
